# versio _travelers guide _for traversing the versio starsystem

**11** noise engineering firmwares · **19** more from the community · **30** firmwares on one sheet

[ fsu ] press · [ fsu ] hold · › then · noon = 12 o'clock · cw / ccw = clockwise / counter

one body, many firmwares · every control below is named by its number on the numbered panel · firmware prices as listed by each developer, 2026.10 · every noise engineering firmware is free to swap · pink = hold

## 01 the platform

vrs_01

| | |
|---|---|
| 1–7 | seven knobs, each with its own cv jack · 0–5 v · the knob is an offset |
| abc xyz | two 3-way switches · positions read left / middle / right |
| fsu | button + gate jack (high above about 2 v) · each firmware names it: tap, hit, gate… |
| in 1 in 2 | stereo in · in 1 is normalled to in 2 (mono in = both) |
| out 1 out 2 | stereo out |
| LEDs | 4 rgb lights · at boot their colours identify the firmware |
| size | 10 hp · 25 mm deep · 125 mA +12 v · 10 mA –12 v |

## 02 swapping firmware

vrs_02

| | |
|---|---|
| noise engineering | all 11 run on any versio, free · about a minute |
| the tool | noise engineering firmware swap · also built into world of versio |
| browser | chromium-based (webusb): chrome, edge, opera · not firefox or safari |
| cable | micro usb **data** cable to the back of the module (charge-only fails) |
| steps | case off · unscrew · unplug the ribbon · usb in · follow the app · windows may need a one-time zadig driver |
| a custom .bin | the same updater: select custom file · or the daisy web programmer |
| dfu mode | hold the board's boot button, tap reset (cithara: hold 1, tap 2) |
| some builds | need the daisy bootloader first (v6.4 via flash.daisy.audio) |
| going back | reload any noise engineering firmware from world of versio |
